## Locknut

Material	Manufacturing Method	Thread Accuracy	Run Out
SCM440(42CrMo4) Tempered	Precision Grinding	ISO 4H	M14~200 : 0.002mm

Hardness	Manufacturing Method	Thread Accuracy	Run Out
HRC 28° ~ 32°	Precision Turning	ISO 4H	M14~200 : 0.005mm M210~300 : 0.007mm

### Features

#### 30° Thread Angle Design

The 30° thread angle design effectively prevents any loosening.

#### 3 Point Locking

Using a 3 point locking mechanism provides a more secure fastening effect.

#### Excellent Locking Design

The excellent locking design allows the brass threads to fully match the external threads.

#### Reduce Torque Issues

The 30° angle design helps reduce torque issues caused by loose screws, improving safety and stability.

## Locknut

Material	Manufacturing Method	Thread Accuracy	Run Out
SCM440(42CrMo4) Tempered	Precision Grinding	ISO 4H	M6~200 : 0.002mm

Hardness	Manufacturing Method	Thread Accuracy	Run Out
HRC28° ~32°	Precision Turning	ISO 4H	M6~200 : 0.005mm M210~300 : 0.007mm

### Features

#### 3-way Radial Locking

Utilizes a radial three-point locking mechanism to ensure a secure locking effect

#### Suitable for situations where locknut space is limited

Especially suitable for applications where the locknut space is limited, making it impossible to use other thicker products

#### Thin Design

This product is thinner than others, making it suitable for when installation space is limited.

## Locknut

Material	Hardness	Manufacturing Method	Thread Accuracy	Run Out
S45C(C45E4) Tempered	HRC 26° ~ 28°	Precision Turning	ISO 4H	M5~40 : 0.005mm

### Features

#### Square Shape Design

The YSRN nut is designed with a square appearance, which may provide better grip and fastening.

#### 2 Point Locking Screws in a 90° Position

The nut is fixed at a 90° angle using two locking screws, making it suitable for bearing seat support.

#### Internal threads and end surfaces are machined simultaneously

Internal threads and end surfaces are machined simultaneously to ensure high accuracy.
