Independent Auditors' Review Report
(2025) Cai-Shen-Bao-Zi No. 25002277

To: TBI Motion Technology Co., Ltd.

Foreword

We have duly audited the Consolidated Balance Sheet of TBI Motion Technology Co., Ltd. and its subsidiaries as of September 30, 2025 and 2024, the Consolidated Statement of Comprehensive Income from July 1 to September 30, 2025 and 2024 and from January 1 to September 30, 2025 and 2024, the Consolidated Statement of Changes in Equity and the Consolidated Cash Flow Statement from January 1 to September 30, 2025 and 2024, as well as the Notes to the Consolidated Financial Statements (including the summary of significant accounting policies). Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34 “Interim Financial Reporting” endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China. Our responsibility is to express a conclusion on the consolidated financial statements based on our reviews.

Scope

We conducted ours reviews in accordance with the Standards on Review Engagement, TWSRE 2410 “Review of Financial Information Performed by the Independent Auditor of the Entity.” A review of consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that caused us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of TBI Motion Technology Co., Ltd. and its

subsidiaries as of September 30, 2025 and 2024 and their consolidated financial performance from July 1 to September 30, 2025 and 2024 and from January 1 to September 30, 2025 and 2024, as well as the consolidated cash flow from January 1 to September 30, 2025 and 2024 in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34 “Interim Financial Reporting” endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

TBI Motion Technology Co., Ltd. and Subsidiaries

Notes to the Consolidated Financial Statements

Third Quarter in 2025 and 2024

Unit: NT\$ thousand (unless otherwise specified)

1. Company history

TBI Motion Technology Co., Ltd. (hereinafter referred to as the “Company”) was incorporated in the Republic of China. The Company and its subsidiaries’ (hereinafter referred to as “the Group”) main business scope is manufacturing and sales of precision transmission components for industrial automation, ball screws and linear slides. The Group's shares have been traded on the Taiwan Stock Exchange since August 15, 2018.

2. Date and procedure for approving the financial statements

This consolidated financial statement was announced after being submitted to the Board of Directors on November 7, 2025.

3. Application of new and amended standards and interpretations

(1) The impact of the adoption of the new and amended IFRS Accounting Standards approved and issued into effect by the Financial Supervisory Commission (hereinafter referred to as the “FSC”)

The following table sets forth the standards and interpretations of new releases, amendments, and revisions of the IFRS Accounting Standards applicable in 2025 that were approved and promulgated by the FSC:

| New/amended/revised standards and interpretations | Effective date announced by IASB |
|---|-------------------------------------|
| Amendments to IAS 21 “Lack of Exchangeability” | January 1, 2025 |

The Group has assessed that the standards and interpretations above have no significant impact on the financial position and financial performance of the Group.

(2) The impact of not yet adopting the new and revised IFRS Accounting Standards recognized by the FSC

The following table summarizes the standards and interpretations for the new releases, amendments, and revisions of the IFRS Accounting Standards applicable in 2026 as approved by the FSC:

| New/amended/revised standards and interpretations | Effective date announced by IASB |
|--|-------------------------------------|
| Amendments to IFRS No. 9 and IFRS No. 7 "Amendment to the Classification and Measurement of Financial Instruments" | January 1, 2026 |
| Amendments to IFRS 9 and IFRS 7 "Amendments on Contracts Involving Natural Electricity" | January 1, 2026 |
| IFRS 17 "Insurance Contracts" | January 1, 2023 |
| Amendments to IFRS 17 "Insurance Contracts" | January 1, 2023 |
| Amendments to IFRS 17 "Initial Application of IFRS 17 and IFRS 9 - Comparative Information" | January 1, 2023 |
| Annual Improvements to IFRS Accounting Standards - Volume 11 | January 1, 2026 |

The Group has assessed that the standards and interpretations above have no significant impact on the financial position and financial performance of the Group.

(3) Impacts of IFRS Accounting Standards issued by the IASB but not yet endorsed by the FSC

The following table summarizes the standards and interpretations of new releases, amendments, and revisions to the IFRS Accounting Standards issued by the IASB but not yet recognized by the FSC:

| New/amended/revised standards and interpretations | Effective date announced by IASB |
|--|-------------------------------------|
| Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets between an Investor and its Associate or Joint Venture" | To be determined by IASB |
| IFRS 18 "Presentation and Disclosure in Financial Statements" | January 1, 2027 (Note) |
| IFRS 19 "Subsidiaries without Public Accountability: Disclosures" | January 1, 2027 |

Note: The FSC announced in a press release dated September 25, 2025, that public companies shall apply International Financial Reporting Standard (IFRS) 18 (hereinafter referred to as IFRS 18) starting from the fiscal year 2028; furthermore, if an entity requires early adoption of IFRS 18, it may elect to apply the provisions of IFRS 18 in advance after the FSC endorses IFRS 18.

Except for the following, the Group has assessed that the standards and interpretations above have no significant impact on the Group's financial position and financial performance and the amount of the relevant impact will be disclosed when the assessment is completed:

IFRS 18 "Presentation and Disclosure in Financial Statements" replaces IAS 1 and updates the

structure of the comprehensive income statement, adds the disclosure of management performance measurement and strengthens the application in the summary and principle of subdivision of the main financial statements and notes.

4. Summary of significant accounting policies

The significant accounting policies adopted in the preparation of the consolidated financial statements are described as follows. Unless otherwise stated, these policies apply consistently throughout the reporting period.

(1) Compliance statement

The consolidated financial statements are prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and IAS 34 "Interim Financial Reporting" endorsed and issued into effect by the FSC.

(2) Basis of preparation

- A. Except for the following material items, this consolidated financial statement has been prepared at historical cost:
 - (A) Financial assets and liabilities (including derivatives) at fair value through profit or loss were measured at fair value.
 - (B) Financial assets measured at fair value through other comprehensive income were measured at fair value.
- B. It is necessary to use some important accounting estimates in the preparation of the financial statements in compliance with the International Financial Reporting Standards, International Accounting Standards, Interpretations and Interpretations (hereinafter referred to as IFRSs) approved and issued into effect by the FSC. In the process of applying the Group's accounting policies, it also requires the management to exercise its judgment, and items that involve a high degree of judgment or complexity, or involve significant assumptions and estimates in the consolidated financial statements. Please refer to Note 5 for details.

(3) Basis of consolidation

- A. Principles for the preparation of consolidated financial statements
 - (A) The Group included all subsidiaries in the consolidated financial statements. Subsidiaries refer to individual entities (including structured individual entities) that the Group has the right to control. When the Group is exposed to or entitled to variable remuneration from participation in the entity and through the power over the entity having influence over the returns, the Group controls the entity. Subsidiaries are included in the consolidated financial statements from the date the

Group acquires the control, and the consolidation is terminated from the date of loss of control.

- (B) Inter-company transactions, balances and unrealised gains or losses on transactions between companies within the Group have been eliminated. The accounting policies of the subsidiaries have been adjusted as necessary to be consistent with the policies adopted by the Group.
- (C) The components of profit or loss and other comprehensive income are attributed to the owners and non-controlling interests of the parent company; the total amount of comprehensive income is also attributed to the owners and non-controlling interests of the parent company, even if the resulting non-controlling interests incur balance.
- (D) If the change in the shareholding of the subsidiary does not result in the loss of control (transaction with non-controlling interests), it is treated as an equity transaction, that is, it is regarded as a transaction with the owner. The difference between the adjusted amount of the non-controlling interests and the fair value of the consideration paid or received is recognized directly in equity.
- (E) When the Group loses control of a subsidiary, the remaining investment in the former subsidiary is re-measured at fair value, and treated as the fair value of the initially recognized financial assets or the cost of the investment in affiliates or joint ventures initially. The difference between the fair value and the carrying amount is recognized in current profit or loss. The accounting treatment of all amounts related to the subsidiary previously recognized in other comprehensive income shall be the same as the basis for the direct disposal of the relevant assets or liabilities by the Group. That is, if the profit or loss previously recognized as other comprehensive income will be reclassified as profit or loss when the relevant assets or liabilities are disposed, the profit or loss will be reclassified from equity to profit or loss when the significant control over the subsidiary is lost.

B. Subsidiaries included in the consolidated financial statements:

| Name of investor | Name of subsidiary | Nature of business | Percentage of equity held | | | Description |
|---------------------------------|-----------------------------------|--|---------------------------|-------------------|--------------------|-------------|

| TBI Motion Technology (HK) LTD. | TBI Motion Technology (Jiangsu) Co., Ltd. | Sale of precision transmission components for the automated industry | 100% | - | - | Note |

Note: In response to operational needs and to expand its business scope, the Group invested in and established TBI Motion Technology (Jiangsu) Co., Ltd. on July 10, 2025, holding 100% of the equity.

- C. Subsidiaries not included in the consolidated financial statements: None.
- D. Different adjustment and treatment methods of subsidiaries during the accounting period: None.
- E. Material restriction: None.
- F. Subsidiaries with non-controlling interests that are material to the Group: None.

(4) Foreign currency translation

The items listed in the financial statements of each entity within the Group are measured using the currency of the primary economic environment in which the individual operates (i.e. the functional currency). The presentation currency of the consolidated financial statements is the functional currency of the Company, which is "NTD".

- A. Transactions and balances in foreign currency
 - (A) Transactions denominated in foreign currencies are translated into the functional currency using the spot exchange rate on the transaction date or the measurement date and the translation differences arising from such transactions are recognized in profit or loss for the current period.
 - (B) The balance of monetary assets and liabilities denominated in foreign currencies is adjusted according to the spot exchange rate on the balance sheet date, and the translation difference arising from the adjustment is recognized in the current profit or loss.
 - (C) For the balance of non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value through profit or loss, they are adjusted

using the spot exchange rate on the balance sheet date, and the exchange difference arising from the adjustment is recognized in the current profit or loss; if measured at fair value through other comprehensive income, the adjustment is valued according to the spot exchange rate on the balance sheet date, and the exchange difference arising from the adjustment is recognized in other comprehensive income; if not measured at fair value, it is measured at the historical exchange rate on the initial transaction date.

(D) All foreign exchange gains and losses are reported in the "other gains and losses" of the Statement of Comprehensive Income.

B. Translation of foreign operations

For all group individuals and affiliated enterprises whose functional currency is different from the presentation currency, the operating results and financial position shall be translated into the presentation currency in the following ways:

(A) The assets and liabilities expressed in each balance sheet are translated at the closing exchange rate on the balance sheet date;

(B) The income, expenses and losses expressed in each comprehensive income statement are translated at the average exchange rates of the current period;

(C) All exchange differences arising from translation are recognized in other comprehensive income.

(5) Classification criteria for current and non-current assets and liabilities

A. Assets that meet one of the following conditions are classified as current assets:

(A) The asset is expected to be realized, or intended to be sold or consumed in the normal business cycle.

(B) Mainly held for the purpose of trading.

(C) Assets expected to be realized within 12 months after the reporting period.

(D) Cash or cash equivalents (excluding assets restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period).

The Group classifies all assets that do not meet the above conditions as non-current.

B. Liabilities that meet one of the following conditions are classified as current liabilities:

(A) Expected to be settled in the normal business cycle.

(B) Mainly held for the purpose of trading.

(C) Liabilities to be settled within 12 months after the reporting period.

(D) Those without the right to defer the settlement of liabilities for at least 12 months after the reporting period.

The Group classifies all liabilities that do not meet the above conditions as non-current.

(6) Cash equivalents

Cash equivalent is a short-term investment with high liquidity that is readily convertible into known amounts of cash and is subject to an insignificant risk of changes in value. Time deposits that meet the definition above and are held to meet short-term cash commitments in operations are classified as cash equivalents.

(7) Financial assets measured at fair value through profit or loss

- A. Financial assets measured at fair value through profit or loss are financial assets that are not measured at amortized cost or fair value through other comprehensive income.
- B. The Group adopts trade date accounting for financial assets measured at fair value through profit or loss that are customary transactions.
- C. The Group measures their fair value at the time of initial recognition and the relevant transaction costs are recognized in profit or loss; subsequently, they are measured at fair value, and the profit or loss is recognized in profit or loss.
- D. When the right to receive dividends is determined, economic benefits related to dividends are likely to flow in, and when the amount of dividends can be reliably measured, the Group recognizes dividend income in profit or loss.

(8) Financial assets measured at fair value through other comprehensive income

- A. Refers to an irrevocable choice at the time of initial recognition to report changes in the fair value of investments in equity instruments that are not held for trading in other comprehensive income.
- B. The Group adopts trade date accounting for financial assets measured at fair value through other comprehensive income in accordance with transaction practices.
- C. The Group measures according to its fair value plus transaction cost at the time of initial recognition, and subsequently measured at fair value: changes in fair value of equity instruments are recognized in other comprehensive income, and at the time of derecognition, the accumulated profit or loss previously recognized in other comprehensive income shall not be reclassified as profit or loss, but transferred to retained earnings. When the right to receive dividends is determined, economic benefits related to dividends are likely to flow in, and when the amount of dividends can be reliably measured, the Group recognizes dividend income in profit or loss.

(9) Financial assets measured at amortized cost

- A. Refers to those who meet the following conditions at the same time:
 - (A) The financial asset is held under the business model for the purpose of collecting contractual cash flow.
 - (B) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.
- B. The Group adopts trade date accounting for financial assets measured at amortized cost in accordance with trading practices.
- C. The Group holds time deposits that do not qualify as cash equivalents. Due to the short holding period, the impact of discounting is not significant and is measured at the investment amount.

(10) Accounts and notes receivable

- A. It refers to accounts and notes that have been unconditionally received in exchange for the right to the amount of consideration for the delivery of goods or services as agreed in the contract.
- B. The non-interest-bearing short-term accounts and notes receivable is barely affected by discounting, so the Group measures them at the original invoice amount.

(11) Financial assets impairment

On each balance sheet date, the Group, regarding debt instrument investments measured at fair value through other comprehensive income and financial assets measured at amortized cost, considering all reasonable and corroborating information (including forward looking ones), if the credit risk has not increased significantly since the initial recognition, the loss allowance is measured at the 12-month expected credit loss amount; if the credit risk has increased significantly since the original recognition, the loss allowance is measured at the lifetime expected credit loss amount. For accounts receivable or contract assets that do not include a significant financial component, the loss allowance is measured at the amount of lifetime expected credit losses.

(12) Derecognition of financial assets

When the contractual right to receive the cash flow from the financial asset expires, the financial asset will be derecognized.

(13) Inventory

Inventories are measured at the lower of cost or net realizable value, and the cost is determined in accordance with the weighted average method. The cost of finished goods and work-in-progress includes raw materials, direct labor, other direct costs, and production-related

manufacturing expenses (allocated according to normal production capacity), but does not include borrowing costs. When comparing whether the cost or the net realizable value is lower, the item-by-item comparison method is adopted. The net realizable value refers to the estimated selling price in the normal business process less the estimated cost of completion and the estimated cost of sales balance.

(14) Non-current assets held for sale

When the carrying amount of a non-current asset is mainly recovered through a sale transaction rather than continued use, and the sale is highly probable, it is classified as an asset held for sale and measured at the lower of its carrying amount or fair value less costs to sell.

(15) Property, plant and equipment

- A. Property, plant and equipment are recorded at acquisition cost, and the relevant interest during the acquisition and construction period is capitalized.
- B. The subsequent cost is included in the book value of the asset or recognized as an individual asset only when the future economic benefits related to the item are likely to flow into the Group and the cost of the item can be reliably measured. The book value of the replaced part shall be derecognized. All other maintenance expenses are recognized in profit or loss for the period when incurred.
- C. Property, plant and equipment are subsequently measured at cost. Except for land, which is not depreciated, the depreciation is calculated using the straight-line method over the estimated useful years. Significant components of property, plant, and equipment are depreciated separately.
- D. The Group reviews the residual value, years of useful life and depreciation method of each asset at the end of each fiscal year. If the residual value and the expected value of useful years are different from the previous estimates, or if the future economic benefits of the asset shows a significant change in the expected consumption pattern, from the date of the change, it is treated in accordance with the provisions of IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors" for changes in accounting estimates. The useful life of each asset is as follows:

| | |
|--------------------------|---------------|
| Buildings | 2 to 45 years |
| Machinery and equipment | 2 to 16 years |
| Transportation equipment | 4 to 6 years |
| Other equipment | 2 to 20 years |

(16) Lessee's lease transaction - right-of-use assets/lease liabilities

- A. Lease assets are recognized as right-of-use assets and lease liabilities on the date they are available for use by the Group. When a lease contract is a short-term lease or lease of a low-value asset, the lease payment is recognized as an expense during the lease term using the straight-line method.
- B. Lease liabilities are recognized at the present value of the lease payments that have not been paid at the commencement date of a lease at the discounted interest rate of the Group's incremental borrowings. The lease payments include:
 - (A) Fixed payments, less any rental incentives that can be collected;
 - (B) Variable lease payments depending on a certain index or rate;Subsequently, an interest approach is adopted to measure said payments at amortized cost, and interest expenses are recognized over the lease term. When changes in the lease term or lease payment due to non-contract modification, the lease liabilities will be reassessed and the right-of-use assets will be adjusted in the remeasurement.
- C. The right-of-use asset is recognized at cost at the commencement date of a lease, and the cost includes:
 - (A) The initially measured amount of the lease liability;
 - (B) Any lease payments made at or before the commencement date;
 - (C) Any initial direct costs incurred; andSubsequently, such an asset is measured at cost and recognized in depreciation expenses when the useful life of the right-of-use asset expires or the lease term expires, whichever is earlier. When a lease liability is reassessed, the remeasurement of the lease liability will be adjusted for the right-of-use asset.
- D. Except for lease modifications with reduced lease scope, where the lessee reduces the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease and recognizes the difference between this and the remeasured lease liability in profit or loss, all other lease modifications result in a corresponding adjustment to the right-of-use asset based on the remeasured lease liability amount.

(17) Intangible assets

Mainly computer software and patents, they are recognized at acquisition cost and amortized using the straight-line method over the estimated useful lives of 1 to 18 years.

(18) Non-financial assets impairment

The Group estimates the recoverable amount of assets with signs of impairment on the balance sheet date. When the recoverable amount is lower than its carrying amount, it is recognized in

impairment loss. The recoverable amount is the fair value of an asset less the cost of disposal or its value in use, whichever is higher. When there is no impairment or reduced impairment in an asset recognized in prior years, the impairment loss shall be reversed, but the increased portion of the carrying amount of the asset due to the reversal of the impairment loss shall not exceed the carrying amount of the asset less depreciation or amortization without impairment loss recognized.

(19) Borrowings

Refers to long-term and short-term borrowings from banks. The Group measures their fair values less transaction costs at the time of initial recognition, and subsequently, for any difference between the price after deducting transaction costs and the redemption value, the effective interest method is used to recognize interest expenses in the outstanding period according to the amortization procedure in profit or loss.

(20) Accounts and notes payable

- A. Refers to debts incurred from the purchase of raw materials, commodities or labor services on credit, and notes payable due to business and non-business reasons.
- B. The non-interest-bearing short-term accounts and notes payable are barely affected by discounting, so the Group measures them at the original invoice amounts.

(21) Convertible corporate bonds payable

The convertible bonds issued by the Group are embedded with conversion rights (i.e. holders can choose the right to convert into the Group's common shares with a fixed amount of shares converted into a fixed number of shares) and repurchase options. At the time of initial issuance, the issuance price is divided into financial assets, financial liabilities or equity according to the issuance conditions, and the treatment is as follows:

- A. Embedded repurchase rights: The net fair value is stated as "financial assets measured at fair value through profit or loss" at the time of initial recognition; subsequently, on the balance sheet date, it is evaluated at the then fair value; differences are recognized as "Gains or losses on financial assets measured at fair value through profit or loss".
- B. Corporate bond host contract: The difference between the fair value measurement at the time of initial recognition and the redemption value is recognized as the corporate bond premium or discount payable; subsequently, the effective interest method is used and recognized in the profit or loss during the outstanding period according to the amortization procedure. It is used as an adjustment item in "Finance cost."
- C. Embedded conversion right (complying with the definition of equity): At the time of initial recognition, the residual value of the issued amount, after adding the above-mentioned "financial assets measured at fair value through profit or loss" and deducting "corporate

bonds payable," is accounted for under "capital equity - stock options" and no subsequent remeasurement is required.

- D. Any directly attributable transaction costs of the issuance are allocated to each component of each liability and equity in accordance with the original book value of each component referred to above.
- E. When the holders are changed, the liability components (including "corporate bonds payable" and "financial assets measured at fair value through profit or loss") are accounted for according to their classification and then plus the carrying amount of "capital reserve - share options" as the issuance cost of the common shares.

(22) Derecognition of financial liabilities

The Group derecognizes financial liabilities when the contractual obligations are fulfilled, cancelled or expired.

(23) Provisions

- A. A provision is recognized when there is a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. A provision is measured based on the best estimate of the present value of an expense required to settle the obligation on the balance sheet date. The discount rate is a pre-tax discount rate that reflects the real-time market assessment of the time value of money and specific risks of the liabilities. Amortization of the discount is recognized in interest expenses. No provisions shall be recognized for future operating losses.
- B. Carbon fees levied under Taiwan's Climate Change Response Act and its sub-laws are not subject to IFRIC 21 "Levies", but are recognized and measured in accordance with IAS 37 "Provisions, Contingent Liabilities and Contingent Assets". If the estimated annual emissions are highly likely to exceed the threshold for carbon fees, carbon fee liabilities should be estimated in interim financial reports based on the proportion of emissions incurred to estimated annual emissions.

(24) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured by the non-discounted amount expected to be paid, and are recognized as expenses when the related services are provided.

B. Pension

Defined contribution plan

For the defined contribution plan, the amount that should be contributed to the pension fund is recognized as the current pension cost on an accrual basis. Prepaid allocations are recognized as assets within the scope of refundable cash or reduction of future payments.

C. Remuneration to employees and directors

Employees' remuneration and directors' remuneration are recognized as expenses and liabilities when they have legal or constructive obligations and the amount can be reasonably estimated. If there is a discrepancy between the actual distributed amount and the estimated amount, it will be treated as a change in accounting estimate. If the employee's remuneration is paid in shares, the number of shares is calculated based on the closing price on the day before the date of the resolution of the board of directors.

(25) Income tax

- A. Income tax expense includes current and deferred income tax. Except for income tax related to items included in other comprehensive income or directly included in equity recognized in comprehensive income or in equity directly, income tax is recognized in profit or loss.
- B. The Group calculates the income tax for the current period in accordance with the tax rate that has been enacted or substantially enacted in the countries where the Group is operating and generating taxable income on the balance sheet date. The management regularly evaluates the status of income tax filings in accordance with the applicable income tax related laws and regulations, and, if applicable, the estimated income tax liabilities based on the tax expected to be paid to the taxing authorities. A surtax is imposed on the undistributed earnings in accordance with the Income Tax Act. In the year following the year in which the earnings are generated, after the shareholders' meeting has passed the earnings distribution proposal, the income tax expense on the undistributed earnings will be recognized based on the earnings actually distributed.
- C. Deferred income tax is recognized based on the temporary differences between the tax bases of assets and liabilities and their carrying amounts on the balance sheet using the balance sheet method. The deferred income tax liabilities arising from the initially recognized goodwill shall not be recognized. If the deferred income tax is derived from the initial recognition of assets or liabilities in the transaction (excluding business combination) on the initial recognition of assets or liabilities, and the transaction does not affect accounting profits or taxable income (taxable losses) at the time of the transaction and does not generate equivalent taxable and deductible temporary differences, they are not to be recognized. If the temporary difference generated by the investment in the subsidiaries can be controlled by the Group to control the time point for the temporary difference to reverse, and the temporary difference is very likely not to be reversed in the

foreseeable future, it shall not be recognized. Deferred income tax is based on the tax rate (and tax law) that has been enacted or substantially enacted at the balance sheet date and that is expected to apply when the related deferred income tax assets are realized or deferred income tax liabilities are settled.

- D. Deferred income tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. At each balance sheet date, unrecognized and recognized deferred income tax assets are reassessed.
- E. When there is a legally enforceable right to offset the amount of current income tax assets and liabilities recognized, and there is an intention to settle on a net basis or realize the assets and settle the liabilities at the same time, offset the current income tax assets and liabilities; when there is a legally enforceable right to offset current income tax assets and current income tax liabilities, and the deferred income tax assets and liabilities are levied by the same taxation authority, the same taxable entity, or different taxable entities and each entity intends to repay on the basis of the net amount or to realize assets and repay liabilities at the same time, the deferred income tax assets and liabilities are offset.
- F. The estimated annual average effective tax rate applies to the interim income tax expenses to calculate the interim income before tax, and the relevant information is disclosed in accordance with the aforementioned policies.
- G. When there is a change in tax rate during the interim period, the Group recognizes the effect of the change all at once in the period in which the change occurs. For income tax related to an item other than profit or loss, the effect of the change is recognized in other comprehensive income or equity, the income tax is related to the item recognized in profit or loss, the effect of the change is recognized in profit or loss.

(26) Share capital

Common shares are classified as equity. Incremental costs directly attributable to the issuance of new shares or share options, net of income tax, are recognized in equity as a deduction of the consideration.

(27) Dividend distribution

Dividends distributed to the Company's shareholders are recognized in the financial statements when the shareholders' meeting resolves to distribute dividends. Cash dividends are recognized as liabilities, and stock dividends are recognized as stock dividends to be distributed and transferred to common shares on the record date of issuance of new shares.

(28) Revenue recognition

Sale of goods

- A. The Group manufactures and sells precision transmission components for industrial automation, ball screws and linear guides. Revenue from sales is recognized when the control of the product is transferred to the customer. That is, when the product is delivered to the customer, the customer has discretion over the sales channel and price of product, and when there are no outstanding performance obligations by the Group that may affect the customer's acceptance of the product. When the product is transported to the designated location, the risk of obsolescence and loss has been transferred to the customer, and the customer accepts the product in accordance with the sales contract, or there is objective evidence to prove that all acceptance criteria have been met.
- B. Accounts receivable are recognized when the goods are delivered to the customer, as the Group has an unconditional right to the contract price from that point on and it only takes time to collect the consideration from the customer.

(29) Government grants

Government subsidies are recognized at fair value when it is reasonably certain that the enterprise will comply with the conditions attached to the government subsidies and the subsidies will be received. If the nature of the government subsidies is to compensate the expenses incurred by the Group, the government subsidies shall be recognized as current profit or loss on a systematic basis in the period in which the relevant expenses are incurred. Government grants related to property, plant and equipment are recognized as non-current liabilities and recognized in current profit or loss on a straight-line basis over the estimated useful life of the related assets.

(30) Operating department

The information of the Group's operating segments is reported in a consistent manner with the internal management reports provided to major operational decision makers. The chief operational decision-makers are responsible for allocating resources to operating segments and evaluating their performance.

5. Major sources of uncertainty in major accounting judgments, estimates and assumptions

When the Group prepared these consolidated financial statements, the management has exercised its judgment to determine the accounting policies adopted, and made accounting estimates and assumptions based on reasonable expectations of future events as of the balance sheet date. Significant accounting estimates and assumptions made may differ from the actual results. Historical experience and other factors will be considered for continuous evaluation and adjustment. Please refer to the following descriptions of significant accounting judgments, estimates and uncertainties of assumptions:

(1) Important judgment on the adoption of accounting policies

None.

(2) Important accounting estimates and assumptions

A. Impairment assessment of accounts receivable

In the process of impairment assessment of accounts receivable, after considering all reasonable and corroborating information (including forward-looking information) for accounts receivable with significant financing components, if the credit risk has not increased significantly since the initial recognition, the loss allowance is measured at the 12-month expected credit loss amount; if the credit risk has increased significantly since the original recognition, the loss allowance is measured at the lifetime expected credit loss amount. For accounts receivable that do not include a significant financial component, the loss allowance is measured at the amount of lifetime expected credit losses. The assessment of this allowance is based on reasonable expectations of future events based on the circumstances at the balance sheet date, but actual results may differ from estimates and potentially lead to significant changes.

B. Inventory valuation

Since inventories must be valued at the lower of cost or net realizable value, the Group must use judgment and estimate to determine the net realizable value of inventories on the balance sheet date. Due to the rapid changes in market products, the Group assesses the amount of inventories due to normal wear and tear, obsolete or no market sales value on the balance sheet date, and writes off the inventory cost to the net realizable value. The inventory valuation was mainly based on the estimated product demand in a specific future period, so significant changes may occur.

B. Corporate bond conversion

As of September 30, 2025, the Company had 18,898,651 ordinary shares issued due to the exercise of conversion rights with respect to the secured and unsecured convertible bonds issued by the Company in 2022, and the change of registration for 933,378 shares has not yet been completed.

(18) Capital surplus

A. According to the Company Act, the capital surplus, including the income derived from issuing shares in excess of par and endowments, in addition to being used to offset a deficit, where the Company has no cumulative deficit, may be used to issue new shares or pay out cash in proportion to the shareholders' shareholdings. In addition, as per the Securities and Exchange Act, where the capital surplus above is used for capitalization, the total amount should not exceed 10% of the paid-in capital each year. The Company shall not use the additional paid-in capital to make up for the capital loss unless the earnings reserve is still insufficient to make up for the capital loss.

B. The changes in the capital reserves of the Company from January 1 to September 30, 2025 and 2024 are as follows:

| | 2025 | | | |

(19) Accumulated deficit to be offset/Undistributed earnings

- A. In accordance with the Company's Articles of Incorporation, where the Company has earnings at the end of the fiscal year, the Company shall first pay all taxes, offset its losses in the previous years and set aside a legal capital reserve at 10% of the net profit, which may be exempted when the accumulated legal capital reserve is equal the paid-in capital of the Company. Then set aside or reverse special capital reserve in accordance with operational demand of the Company and relevant laws or regulations or the requirements of the competent authority. Where there are still remaining earnings, the Board of Directors may propose the distribution of the remaining earnings plus the undistributed earnings of the previous years in the earnings distribution proposal for approval in the shareholders' meeting.
- B. For the stability of the future business and long-term sound financial structure to generate the maximum profits for shareholders, the distribution of shareholders' bonus adopts cash and stock dividends balance policy. The dividends shall not be less than 10% of the distributable earnings in the current year. However, where the accumulated distributable earnings is less than 10% of the paid-in capital, the Company may transfer them into retained earnings and choose not to distribute dividends. During the earnings distribution, the dividends paid in cash shall not be less than 10% of the total dividends distributed in the current year.
- C. The legal reserve may not be used except to make up for the Company's losses and issuing new shares or cash in proportion to the original number of shares held by shareholders. However, if new shares or cash are issued, it shall exceed 25% of the paid-up capital.
- D. When the Company distributes earnings, the special reserve shall be set aside for the debit balance of other equity items on the balance sheet date of the current year according to laws and regulations before distribution. When the debit balance of other equity items is subsequently reversed, the amount of reversal may be included in the distribution available in earnings.
- E. On June 26, 2025, the shareholder's meeting approved by resolution to offset 2024 losses by appropriating \$125,767 from the legal reserve.

12. Others

(1) Capital management

The goal of the Group's capital management is to ensure the continued operation of the Group, maintain the optimal capital structure to reduce the cost of capital, and provide returns for shareholders. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce liabilities. The Group uses the debt capital ratio to monitor its capital, which is calculated by dividing net debt by total capital.

The Group's strategy in 2025 remains the same as that in 2024. Please refer to the consolidated balance sheet and the Group's debt ratio as of September 30, 2025 and 2024.

(2) Financial instruments

A. Types of financial instruments

The Group's financial assets (cash and cash equivalents, financial assets measured at fair value through profit or loss, financial assets measured at amortized cost, net notes receivable, net accounts receivable, other receivables, financial assets measured at fair value through other comprehensive income - non-current, refundable deposits) and financial liabilities (short-term borrowings, notes payable, accounts payable, other payable, lease liabilities (current/non-current), long-term borrowings (including those due within one year), corporate bonds payable, and guarantee deposits received), please refer to the Consolidated Balance Sheet and Note 6 for details.

B. Risk management policy

Risk management is carried out by the Group's Finance Department in accordance with the policies approved by the Board of Directors. The Finance Department of the Group works closely with various operating units within the Group to identify, evaluate and avoid financial risks. The Board of Directors has written principles for overall risk management, and also provides written policies for specific areas and matters, such as exchange rate risk, interest rate risk, credit risk, use of derivative and non-derivative financial instruments, and investment of surplus working capital.

C. Nature and extent of significant financial risk

(A) Market risk

Exchange rate risk

- a. The Group operates in a multinational company, so it is subject to the exchange rate risk arising from transactions with the functional currency of the Company and its subsidiaries, which are mainly USD and RMB. The relevant exchange rate risk comes from future commercial transactions and recognized assets and liabilities.
- b. The Group's business involves some non-functional currencies, therefore it is subject to exchange rate fluctuations. The assets and liabilities denominated in foreign currencies with significant exchange rate fluctuations are as follows:

c. Due to the significant impact of exchange rate fluctuations on monetary items of the Group, the aggregate amounts of all exchange (losses) gains (both realized and unrealized) recognized from July 1 to September 30, 2025 and 2024 and from January 1 to September 30, 2025 and 2024 were \$78,661, \$40,412, (\$109,612) and \$120,209, respectively.

d. The risk analysis of the Group's foreign currency market due to significant exchange rate fluctuations is as follows:

Price risk

- a. The Group's equity instruments exposed to price risk are financial assets held at fair value through other comprehensive income. To manage the price risk of equity instrument investment, the Group will diversify its investment portfolio, and the diversification method is based on the limit set by the Group.
- b. The Group mainly invests in equity instruments issued by domestic companies, and the prices of these equity instruments will be affected by the uncertainty of the future value of the investment target. If the price of these equity instruments rose or fell by 1%, and all other factors remain unchanged, the profit or loss arising from the equity instruments measured at fair value through other comprehensive income from January 1 to September 30, 2025, and 2024, would decrease or increase by \$711 and \$711, respectively.

Cash flow and fair value interest rate risk

- a. The Group's interest rate risk mainly comes from the long-term and short-term borrowings issued at floating interest rates, which expose the Group to cash flow interest rate risk. From January 1 to September 30, 2025 and 2024, the Group's borrowings with floating interest rates were mainly denominated in NTD.
- b. When the borrowing rate increases or decreases by 1%, and all other factors remain unchanged, the net income after tax from January 1 to September 30, 2025 and 2024 will decrease or increase by \$13,322 and \$12,238, respectively, due to changes.

(B) Credit risk

- a. The Group's credit risk refers to the risk of financial loss due to the failure of customers or counterparties of financial instrument transactions to fulfill contractual obligations, mainly from the inability of counterparties to settle accounts receivable in accordance with the collection terms.
- b. The Group establishes credit risk management from the group perspective. For banks and financial institutions, only institutions with good reputation and no

recent major default records can be accepted as trading counterparts. According to the internal credit policy, for each new customer within the Group, management and credit risk analysis must be conducted before the establishment of payment and delivery terms and conditions. The internal risk control evaluates customers' credit quality by considering their financial status, past experience and other factors. The limits of individual risks are determined by the Board of Directors based on internal or external ratings, and the use of credit lines is regularly monitored.

- c. According to the Group's credit risk management procedures, a default is deemed to have occurred when the contract amount is overdue for more than 180 days according to the agreed payment terms.
- d. The Group classifies customers' accounts receivable according to geographical area, customer rating and trade credit risk characteristics, and estimates expected credit losses based on the allowance matrix and loss rate method in a simplified manner.
- e. The indicators used by the Group to determine that the debt instrument investment is subject to credit impairment are as follows:
 - (a) The issuer is in major financial difficulty, or the possibility of bankruptcy or other financial reorganization greatly increases;
 - (b) The issuer disappears from the active market for the financial assets due to financial difficulties;
 - (c) The issuer delays or fails to repay the interest or principal;
 - (d) Unfavorable changes in national or regional economic conditions that result in the issuer's default.
- f. The Group will continue to pursue legal proceedings for the default of financial assets to preserve the rights of the creditor's right. After the recourse procedures, the amount of financial assets for which it is impossible to reasonably expect to be recoverable is written off.
- g. The Group takes into account the consideration of future forward-looking and adjusts the loss rate based on historical and current information in a specific period to estimate the loss allowance for accounts receivable and non-performing loans. The provision matrix for September 30, 2025, December 31, 2024, and September 30, 2024, and loss ratio method are as follows:

| September 30, 2025 | Expected loss rate | Accounts receivable | Non-performing loans | Total book value | Loss allowance |
|-----------------------|--------------------|---------------------|----------------------|------------------|----------------|
| Not past due | 0.03%~2.18% | \$ 418,555 | \$ - | \$ 418,555 | (\$ 6,436) |

h. The table of the changes in the Group's allowance for losses on account receivable with a simplified approach is as follows:

| | 2025 | | |
|-----------------------------|---------------------|----------------------|------------|
| | Accounts receivable | Non-performing loans | Total |
| January 1 | \$ 109,432 | \$ 74,510 | \$ 183,942 |

| Exchange rate effect | 1,141 | 2,310 | 3,451 |
| September 30 | \$ 116,674 | \$ 76,820 | \$ 193,494 |

(C) Liquidity risk

- a. Cash flow forecasting is carried out by each operating entity within the Group and compiled by the Group's Finance Department. The Finance Department of the Group monitors the forecast of the Group's working capital needs to ensure that it has sufficient funds to meet operating needs, and maintains a sufficient undrawn commitment limit at all times to prevent the Group from breaching the relevant borrowing limits or terms. The forecast considers the Group's debt financing plan, debt terms compliance, financial ratio targets in line with the internal balance sheet, etc.
- b. The surplus cash held by each operating entity will be transferred back to the Group's Finance Department when it exceeds the needs for working capital management. The Group's Finance Department, on the other hand, invests the remaining funds in interest-bearing demand deposits and time deposits with appropriate maturities or sufficient liquidity to provide sufficient levels in response to the above forecasts. As of September 30, 2025, December 31, 2024, and September 30, 2024, the Group held cash and cash equivalents of \$753,843, \$732,570, and \$328,192, respectively. Undrawn borrowing facilities were \$464,352, \$579,804, and \$1,656,161, respectively, which are expected to generate cash flows to manage liquidity risk.
- c. The Group's derivative financial liabilities and non-derivative financial liabilities are equivalent to the amounts listed in the consolidated balance sheet based on the remainder of the period from the balance sheet date to the contractual maturity date, except for those listed in the following table, which are all due within one year. The contractual cash flow disclosed is the undiscounted amount as follows:

Non-derivative financial liabilities:

| | Within 1 year | Between 1 and 2 years | Between 2 and 5 years | More than 5 years | Total |
|--|---------------|-----------------------|-----------------------|-------------------|------------|
| September 30, 2025 | | | | | |
| Lease liabilities | \$ 50,271 | \$ 33,123 | \$ 82,425 | \$ 816,744 | \$ 982,563 |
| Long-term borrowings (including those due within one year) | 363,190 | 401,968 | 465,707 | 559,891 | 1,790,756 |

Non-derivative financial liabilities:

| | Within 1 year | Between 1 and 2 years | Between 2 and 5 years | More than 5 years | Total |
|--|---------------|-----------------------|-----------------------|-------------------|--------------|
| December 31, 2024 | | | | | |
| Lease liabilities | \$ 49,215 | \$ 40,250 | \$ 81,653 | \$ 836,930 | \$ 1,008,048 |
| Long-term borrowings (including those due within one year) | 351,755 | 339,836 | 628,949 | 705,542 | 2,026,082 |

Non-derivative financial liabilities:

| September 30, 2024 | Within 1 year | Between 1 and 2 years | Between 2 and 5 years | More than 5 years | Total |
|--|---------------|-----------------------|-----------------------|-------------------|-------------|
| Lease liabilities | \$ 40,823 | \$ 36,315 | \$ 82,100 | \$ 843,658 | \$1,002,896 |
| Long-term borrowings (including those due within one year) | 316,920 | 320,327 | 631,124 | 746,655 | 2,015,026 |

(3) Fair value information

A. The levels of valuation techniques used to measure the fair value of financial and non-financial instruments are defined as follows:

Level 1: The quoted price (unadjusted) is available to the enterprise in an active market for the same assets or liabilities on the measurement date. An active market refers to a market with sufficient frequency and volume of transactions to provide pricing information on an ongoing basis.

Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. This includes the fair value of the embedded call options in the Group's convertible corporate bonds payable.

Level 3: Unobservable inputs for the asset or liability. All the equity instruments invested by the Group for which there is no active market belong to this category.

B. The Group's financial instruments not measured at fair value include cash and cash equivalents, financial assets measured at amortized cost, notes receivable, accounts receivable, other receivables, short-term and long-term borrowings, notes and accounts payable and other payables, for which their book values, are a reasonable approximation to the fair value.

C. The financial and non-financial instruments measured at fair value are classified according to the nature, characteristics, risks and fair value levels of the assets and liabilities. Relevant information is as follows:

(A) The Group's assets and liabilities are classified according to the nature. The relevant information is as follows:

| September 30, 2025 | Level 1 | Level 2 | Level 3 | Total |
|--|---------|---------|---------|-------|
| Assets | | | | |

| Equity securities | \$ - | \$ - | \$ 88,918 | \$ 88,918 |
| Total | \$ - | \$ 458 | \$ 88,918 | \$ 89,376 |

(B) The methods and assumptions used by the Group to measure fair value are as follows:

When evaluating non-standardized and less complex financial instruments, such as debt instruments without an active market, interest rate swap contracts, foreign exchange contracts and options, the Group uses the evaluation techniques widely used by market participants. The parameters used by the valuation model of such financial instruments are usually market observable information.

D. There was no transfer between Levels 1 and 2 from January 1 to September 30, 2025 and 2024.

E. There was no transfer into or out of Level 3 from January 1 to September 30, 2025 and 2024.

F. In the Group's valuation process for fair values classified as at Level 3, the finance department is responsible for independent fair value verification for financial instruments, uses data from independent sources to make the valuation results close to the market level,

and confirms that the source of the data is independent, reliable, consistent with other resources, and representative of the executable price, while regularly calibrating the valuation model, updating the inputs and data required by the valuation model, and making any other necessary fair value adjustments to ensure that the valuation results are reasonable.

G. The quantitative information of the significant unobservable input value of the evaluation model used in the Level 3 fair value measurement and the sensitivity analysis of the significant unobservable input value changes are as follows:

| Fair value on September 30, 2025 | Valuation technique | Unobservable significant input | Range (weighted average) | Relationship between input value and fair value |
|--|----------------------------------|---|--------------------------------|---|
| Non-derivative equity instruments: | | | | |
| Non-listed stocks \$ 88,918 | Comparable Public Company Act | Discount for lack of market liquidity | 21.89% | The higher the lack of market liquidity discount, the lower the fair value. |
| Non-derivative equity instruments: | | | | |
| Non-listed stocks \$ 88,918 | Comparable Public Company Act | Discount for lack of market liquidity | 21.89% | The higher the lack of market liquidity discount, the lower the fair value. |
| Non-derivative equity instruments: | | | | |
| Non-listed stocks \$ 88,918 | Comparable Public Company Act | Discount for lack of market liquidity | 19.54% | The higher the lack of market liquidity discount, the lower the fair value. |

H. The Group has selected a valuation model and valuation parameters after prudent evaluation, but different valuation results may occur due to the use of different valuation models or valuation parameters. For financial assets and financial liabilities classified as Level 3, if the valuation parameters change, the impact on the current profit and loss or other comprehensive income is as follows:

| | September 30, 2025 | | | |
|-------------------|--|--------|--|-----------------------|
| | | | Recognized in other comprehensive income (loss) | |
| | Input value | Change | Favorable change | Unfavorable change |

13. Disclosures in notes

(1) Information on significant transactions

- A. Loaning of funds to others: Please refer to Table 1.
- B. Provisions of endorsements and guarantees to others: None.
- C. Holding of significant securities at the end of the period (excluding the portion held due to investment in a subsidiary or an associate, and the portion held due to an interest in a joint venture): Please refer to Table 2.
- D. Purchases or sales of goods from or to related parties reaching NT\$100 million or 20% of paid-in capital or more: Please refer to Table 3.
- E. Receivables from related parties amounting to at least NT\$100 million or 20% of the paid-in capital: Please refer to Table 4.
- F. The business relationship between the parent company and subsidiaries, and the circumstances of any significant transactions between them: Please refer to Table 5.

(2) Information on investees

The name and location of the investee company and other relevant information (excluding mainland China investee companies): Please refer to Table 6.

(3) Information on investments in mainland China

- A. Basic information: Please refer to Table 7.
- B. Significant transactions with investee companies in mainland China directly or indirectly through enterprises in a third region: Please refer to Table 8.

14. Information of operating segments

(1) General information

The Group only operates in a single industry, and the Group's operating decision-maker has identified the Group as a reportable department based on the overall performance evaluation and resource allocation.

(2) Measurement of segment information

The Group's operating decision-maker evaluates the performance of operating segments based on the after-tax net profit. The measurement indicators are based on the revenue achievement rate, gross profit achievement rate, and net operating profit achievement rate. The status of excessive and short expenses is reviewed on a monthly basis to assess the rationality of resource consumption.

(3) Information on segment profits and losses, assets and liabilities

The information of the segments to be provided to the chief operating decision-maker is as follows:

| From July 1 to September 30, 2025 | Single operating department | Reconciliation and write-off | Total |
|--------------------------------------|--------------------------------|---------------------------------|---------------|
| External revenue | \$ 674,398 | \$ - | \$ 674,398 |

| Segment profit or loss | (\$ 340,241) | \$ - | (\$ 340,241) |

(4) Reconciliation of segment profit and loss

- A. The Group has only a single reportable segment that provides external revenue and profit information to the chief operating decision-maker. The amount in the consolidated statements of comprehensive income is measured in a consistent manner. The net profit of the Group's reportable segment is net loss after tax, no adjustment is required.
- B. The Group has only a single reportable segment, the total assets and total liabilities provided to the chief operating decision-maker and the assets and liabilities of the consolidated balance sheet shall be measured in a consistent manner, and the assets and liabilities of the reportable segment are equal to the total assets and total liabilities, no adjustment is required.
